

College Accelerated Program

Our partnership with Rowan College at Burlington County provides the opportunity for students to earn college credits while attending high school. The College Accelerated Program (CAP) allows PTHS students who take designated high school courses to obtain credit for high school and college credit at the same time. The courses are taken at PTHS and taught by PTHS staff members. Students must earn a minimum of a “C” average in the course to receive college credit. Students must enroll in RCBC at <https://rcbc.dualenroll.com/student/new>. Typically, a 3-credit course at the college costs over \$400.00, however, PTHS CAP students will be given a reduced rate of \$150.00 per three or four-credit course. Note: This rate is determined by RCBC annually.

By partnering with our local community college, our students are given a “jump-start” to their college careers. Students will be able to obtain both high school credit and college credit for the selected course. Below is a list of CAP courses that have been offered in the past. Courses are subject to change each year. Please contact your counselor for the most current CAP list. Questions can be directed to the Counseling Center (609) 893-8141 ext. 1088.

Students will take all courses at PTHS but are allowed to receive college credit while still in high school. Every college/university has guidelines for acceptance of credit. It is strongly recommended to check with the college or university your child will be attending to see which course(s), credits will be accepted.
