Unit 1: [Home](#)

Stage 1: Desired Results

[Standards & Indicators:](#)

World Languages: All students will be able to use a world language in addition to English to engage in meaningful conversation, to understand and interpret spoken and written language, and to present information, concepts, and ideas, while also gaining an understanding of the perspectives of other cultures. Through language study, they will make connections with other content areas, compare the language and culture studied with their own, and participate in home and global communities.

Proficiency Level and Grade Level Performance Benchmark: [Novice-Mid: Students communicate using memorized words and some phrases to talk about familiar topics related to school, home, and the community.](#)

Strand 1 Interpretive Mode

The mode of communication in which students demonstrate understanding of spoken and written communication within the appropriate cultural context. Examples of “one-way” reading or listening include cultural interpretations of print, video, and online texts, movies, radio and television broadcasts, and speeches. Interpretation beyond the Novice level differs from comprehension because it implies the ability to read or listen “between the lines” and “beyond the lines.”

Content Statement

Linguistic:

The Novice-Mid language learner understands and communicates at the word level and can independently identify and recognize memorized words and phrases that bring meaning to text.

Cultural:

- Through the target language, learners recognize and identify the names of a few typical products related to everyday life in the target culture and in the learners’ own culture. Topics that assist in the development of this understanding should include, but are not limited to the following themes:
 - self
 - friends
 - family
 - pets
 - physical/personality descriptions
 - weather, school
 - likes/dislikes
 - pastimes.
- Learners recognize and identify a few typical practices of the target culture . Topics that assist in the development of this understanding should include, but are not limited to the following themes:
 - respect for different family members and other individuals in a society
 - similarities and differences of school routines and expectations
 - animals in the target culture(s) compared to those in the students’ own culture(s)
 - the effects of weather patterns in target language regions of the world and in the students’ own regions

Indicator # & Indicators

- **7.1.NM.IPRET.1: Identify familiar spoken and written words, phrases, and simple sentences contained in culturally authentic materials and other resources related to targeted themes.**

- **7.1.NM.IPRET.5:** Demonstrate comprehension of brief oral and written messages found in short culturally authentic materials on global issues, including climate change

Strand 2 Interpersonal Mode

The mode of communication in which students engage, understand, and communicate at the word and phrase level independently when responding to learned questions, ask memorized questions, state needs and preferences, and briefly describe people, places, and things. They have no real functional abilities and, therefore, cannot participate in true exchanges of information.

Content Statement

Linguistic:

The Novice-Mid language learner understands and communicates to exchange information at the word level and can use memorized words and phrases independently to:

- Negotiate meaning between and among individuals
- Respond to learned questions.
- Ask memorized questions.
- Describe people, places, and things.

Cultural:

The Novice-Mid Cultural Content Statements remain the same for all the strands.

Indicator # & Indicators

- **7.1.NM.IPERS.6:** Exchange brief messages with others about climate in the target regions of the world and in one's own region using memorized and practiced words, phrases, and simple, formulaic sentences

Strand 3 Presentational Mode

The mode of communication in which students present, understand, and communicate at the word and phrase level and can use memorized words and phrases independently when stating needs and preferences. They can describe people, places, and things with a combination of memorized words and phrases and a few simple sentences formed by combining and recombining learned language.

Spanish 6

Content Statement

General Instructional Strategies for Communicative-based Language Classrooms

- Maximize the use of target language with most instructions, directions and explanations given in the target language if possible based on terms of relevance, learning styles and abilities.
- Repeat previously-learned material through activities, readings, songs and games.
- Establish a consistent routine and structure.
- Use repetitive language within your routine.

- Duolingo
- Quizlet
- Kahoot!
- Google Classroom
- Google Tools: Docs, Forms, Sheets, Meets, etc.

Spanish 6

- Use real objects, gestures, pictures, and other visuals to convey meaning.
- Focus on language that is concerned with functional situations and authentic utterances.
- Do not always insist on complete sentences, but mirror natural speech patterns.
- Adopt a conversational approach replicating “real” situations likely to occur.
- Teach vocabulary in context, including all kinds of idiomatic phrases.
- Use paired activities and small-group learning.
- Use cooperative learning tools that maximize student engagement.
- Use technology.
- Use a variety of print and nonprint materials.
- Strive to develop cultural awareness using authentic cultural realia as a springboard for communication in the language.
- Emphasize acceptable communication, rather than near-native pronunciation.
- Ensure a match between the learner and the language in terms of relevance and learning style.

World Language Methodologies

Total Physical Response or TPR: Developed by Dr. Jams J. Asheri, this methodology teaches language or vocabulary by utilizing physical movement to respond to verbal input. The process mimics the way infants acquire language naturally.

The Waldorf Foreign Language Approach: This methodology is based on the idea that developing the ability to communicate is the primary purpose of foreign language acquisition. In addition, the Waldorf Approach affirms that the study of world languages raises social consciousness and fosters an interest and respect for others. In essence, the study of a world language is a window into the soul of another culture. “Because the manner in which we think is expressed through the language that we speak, we nurture a cultural understanding of other peoples through acquiring their language”

The Communicative Approach: The core principles of the Communicative Approach are that learners learn through authentic communication experiences and meaningful communication should be the goal of the world language lesson. Communication involves diverse language skills and learning is a creative process that involves trial and error.

Spanish 6

The Grammar-Translation Method: A traditional method of teaching world languages, students learn grammatical rules and then apply those rules by translating sentences between the target language and the native language.

The Deductive Method: Grammatical rules are deduced by students. Students are given samples of language and must deduce the grammatical rules independently. In deductive teaching in world language, a word, phrase or sentences is presented as a problem, students analyze the information, formulate a rule, test the rule, and make a conclusion. The Deductive Method is preferred to the Grammar-Translation Method because students retain grammatical rules more efficiently, build analytical skills and are encouraged to become self-learners.

Cooperative Learning Strategies

Kagan Cooperative Learning: Kagan Structures are instructional strategies designed to promote cooperation and communication in the classroom, boost students' confidence and retain their interest in classroom interaction.

Unit 2: Restaurant

Stage 1: Desired Results

Standards & Indicators:

World Languages: All students will be able to use a world language in addition to English to engage in meaningful conversation, to understand and interpret spoken and written language, and to present information, concepts, and ideas, while also gaining an understanding of the perspectives of other cultures. Through language study, they will make connections with other content areas, compare the language and culture studied with their own, and participate in home and global communities.

Proficiency Level and Grade Level Performance Benchmark: **Novice-Mid:** Students communicate using memorized words and some phrases to talk about familiar topics related to school, home, and the community.

Strand 1 Interpretive Mode

The mode of communication in which students demonstrate understanding of spoken and written communication within the appropriate cultural context. Examples of “one-way” reading or listening include cultural interpretations of print, video, and online texts, movies, radio and television broadcasts, and speeches. Interpretation beyond the Novice level differs from comprehension because it implies the ability to read or listen “between the lines” and “beyond the lines.”

Content Statement

Linguistic:

The Novice-Mid language learner understands and communicates at the word level and can independently identify and recognize memorized words and phrases that bring meaning to text.

Cultural:

- Through the target language, learners recognize and identify the names of a few typical products related to everyday life in the target culture and in the learners’ own culture. Topics that assist in the development of this understanding should include, but are not limited to the following themes:
 - self
 - friends
 - family
 - pets
 - physical/personality descriptions
 - weather, school
 - likes/dislikes
 - pastimes.
- Learners recognize and identify a few typical practices of the target culture . Topics that assist in the development of this understanding should include, but are not limited to the following themes:
 - respect for different family members and other individuals in a society
 - similarities and differences of school routines and expectations
 - animals in the target culture(s) compared to those in the students’ own culture(s)
 - the effects of weather patterns in target language regions of the world and in the students’ own regions

- Repeat previously-learned material through activities, readings, songs and games.
- Establish a consistent routine and structure.
- Use repetitive language within your routine.
- Use real objects, gestures, pictures, and other visuals to convey meaning.
- Focus on language that is concerned with functional situations and authentic utterances.
- Do not always insist on complete sentences, but mirror natural speech patterns.
- Adopt a conversational approach replicating “real” situations likely to occur.
- Teach vocabulary in context, including all kinds of idiomatic phrases.

Resources:

- Teacher-generated activities, worksheets, and assessments
- Duolingo
- Quizlet
- Kahoot!
- Google Classroom
- Google Tools: Docs, Forms, Sheets, Meets, etc.
- Kagan Structures
- Internet

Spanish 6

- Use paired activities and small-group learning.
- Use cooperative learning tools that maximize student engagement.
- Use technology.
- Use a variety of print and nonprint materials.
- Strive to develop cultural awareness using authentic cultural realia as a springboard for communication in the language.
- Emphasize acceptable communication, rather than near-native pronunciation.
- Ensure a match between the learner and the language in terms of relevance and learning style.

World Language Methodologies

Total Physical Response or TPR: Developed by Dr. Jams J. Asheri, this methodology teaches language or vocabulary by utilizing physical movement to respond to verbal input. The process mimics the way infants acquire language naturally.

The Waldorf Foreign Language Approach: This methodology is based on the idea that developing the ability to communicate is the primary purpose of foreign language acquisition. In addition, the Waldorf Approach affirms that the study of world languages raises social consciousness and fosters an interest and respect for others. In essence, the study of a world language is a window into the soul of another culture. "Because the manner in which we think is expressed through the language that we speak, we nurture a cultural understanding of other peoples through acquiring their language"

The Communicative Approach: The core principles of the Communicative Approach are that learners learn through authentic communication experiences and meaningful communication should be the goal of the world language lesson. Communication involves diverse language skills and learning is a creative process that involves trial and error.

The Grammar-Translation Method: A traditional method of teaching world languages, students learn grammatical rules and then apply those rules by translating sentences between the target language and the native language.

The Deductive Method: Grammatical rules are deduced by students. Students are given samples of language and must deduce the grammatical rules independently. In deductive teaching in world language, a word, phrase or sentences is presented as a problem, students analyze the information, formulate a rule, test the rule, and

Spanish 6

make a conclusion. The Deductive Method is preferred to the Grammar-Translation Method because students retain grammatical rules more efficiently, build analytical skills and are encouraged to become self-learners.

Cooperative Learning Strategies

Kagan Cooperative Learning: Kagan Structures are instructional strategies designed to promote cooperation and communication in the classroom, boost students' confidence and retain their interest in classroom interaction.

Unit 3: Clothing & Shopping

Stage 1: Desired Results

Standards & Indicators:

World Languages: All students will be able to use a world language in addition to English to engage in meaningful conversation, to understand and interpret spoken and written language, and to present information, concepts, and ideas, while also gaining an understanding of the perspectives of other cultures. Through language study, they will make connections with other content areas, compare the language and culture studied with their own, and participate in home and global communities.

Proficiency Level and Grade Level Performance Benchmark: **Novice-Mid:** Students communicate using memorized words and some phrases to talk about familiar topics related to school, home, and the community.

Strand 1 Interpretive Mode

The mode of communication in which students demonstrate understanding of spoken and written communication within the appropriate cultural context. Examples of “one-way” reading or listening include cultural interpretations of print, video, and online texts, movies, radio and television broadcasts, and speeches. Interpretation beyond the Novice level differs from comprehension because it implies the ability to read or listen “between the lines” and “beyond the lines.”

Content Statement

Linguistic:

The Novice-Mid language learner understands and communicates at the word level and can independently identify and recognize memorized words and phrases that bring meaning to text.

Cultural:

- Through the target language, learners recognize and identify the names of a few typical products related to everyday life in the target culture and in the learners’ own culture. Topics that assist in the development of this understanding should include, but are not limited to the following themes:
 - self
 - friends
 - family
 - pets
 - physical/personality descriptions
 - weather, school
 - likes/dislikes
 - pastimes.
- Learners recognize and identify a few typical practices of the target culture . Topics that assist in the development of this understanding should include, but are not limited to the following themes:
 - respect for different family members and other individuals in a society
 - similarities and differences of school routines and expectations
 - animals in the target culture(s) compared to those in the students’ own culture(s)
 - the effects of weather patterns in target language regions of the world and in the students’ own regions

Strand 2 Interpersonal Mode

The mode of communication in which students engage, understand, and communicate at the word and phrase level independently when responding to learned questions, ask memorized questions, state needs and preferences, and briefly describe people, places, and things. They have no real functional abilities and, therefore, cannot participate in true exchanges of information.

- Negotiate meaning between and among individuals
- Respond to learned questions.
- Ask memorized questions.
- Describe people, places, and things.

Cultural:

The Novice-Mid Cultural Content Statements remain the same for all the strands.

interest and respect for others. In essence, the study of a world language is a window into the soul of another culture. "Because the manner in which we think is expressed through the language that we speak, we nurture a cultural understanding of other peoples through acquiring their language"

The Communicative Approach: The core principles of the Communicative Approach are that learners learn through authentic communication experiences and meaningful communication should be the goal of the world language lesson. Communication involves diverse language skills and learning is a creative process that involves trial and error.

The Grammar-Translation Method: A traditional method of teaching world languages, students learn grammatical rules and then apply those rules by translating sentences between the target language and the native language.

The Deductive Method: Grammatical rules are deduced by students. Students are given samples of language and must deduce the grammatical rules independently. In deductive teaching in world language, a word, phrase or sentences is presented as a problem, students analyze the information, formulate a rule, test the rule, and make a conclusion. The Deductive Method is preferred to the Grammar-Translation Method because students retain grammatical rules more efficiently, build analytical skills and are encouraged to become self-learners.

Cooperative Learning Strategies

Kagan Cooperative Learning: Kagan Structures are instructional strategies designed to promote cooperation and communication in the classroom, boost students' confidence and retain their interest in classroom interaction.
